

Homework Practice

4MR1.1, 4NS3.0

*Problem-Solving Investigation***Solve. Tell the strategy that you used.**

- Jayden has read 22 pages of the newspaper. Adrian has read 42 pages. How many pages have they read altogether?

- Sergio was building a model plane. It took 6 days to build the model. If he worked for 4 hours a day, how many total hours did he take to complete the model? What if it took 7 days? 8 days?

- If there are 24 pieces of popcorn in a serving, and you eat 72 pieces, how many total servings have you consumed?

How many pieces of popcorn will you need for 4 people allowing 1 serving per person?

- Catalina, Jose, and Diego went to get a pizza. If they spent \$18 altogether and they split the bill evenly, what did they each pay?

Spiral Review**Multiply or divide. (Lesson 5-6)**

- $60 \div 5 = \underline{\quad}$
- $4 \times 11 = \underline{\quad}$
- $7 \times 12 = \underline{\quad}$
- $24 \div 12 = \underline{\quad}$
- $33 \div 3 = \underline{\quad}$
- $9 \times 12 = \underline{\quad}$
- A school bus can fit 4 passengers in each row. If you have a bus with 12 rows, how many students can fit on it? _____
- Look back over this page. Circle all the answers on this page that are less than 20.
